

## IFGICT Summit Conference: eGov Unit

### Unit Focus

- **Core Mandate:** Dedicated to the broader spectrum of e-Government and e-Democracy.
- **Key Areas:** Digital Government, e-Participation, Open Government, Smart Government, AI Government, GovTech, Algorithmic Governance, and related digitalization and governance topics.

### Conference Objectives

- Foster knowledge sharing and collaboration among government officials, ICT experts, and academia.
- Showcase innovative e-government solutions and best practices.
- Identify emerging trends and challenges in the digital governance landscape.
- Promote the adoption of e-government initiatives to enhance public service delivery.

### Unit Structure

- **Conference Chair:** A high-profile figure with expertise in e-government.
- **Program Committee:** Composed of renowned academics, industry experts, and government officials.
- **Organizing Committee:** Responsible for logistics, marketing, and finance.
- **Technical Committee:** Overseeing the technical aspects of the conference, including IT infrastructure and platform.

## Key Components

### *1. International Keynote Speakers*

- **Selection Criteria:**
  - Global thought leaders in e-government and related fields.
  - Proven track record in implementing successful e-government initiatives.
  - Ability to inspire and engage the audience.
- **Potential Speakers:**
  - List of prominent figures in the e-government domain
  - Consider inviting representatives from leading international organizations (UN, OECD, World Bank)

### *2. ICT Topics for e-Gov*

- **Focus Areas:**
  - Digital transformation strategies
  - Cybersecurity and data privacy
  - Emerging technologies (AI, blockchain, IoT)
  - Citizen-centric service delivery
  - E-participation and digital democracy
  - Open data and government transparency
  - Smart city initiatives
  - Digital government platforms and infrastructure
- **Session Formats:**
  - Keynote speeches
  - Panel discussions
  - Workshops
  - Case studies

### *3. Call for Projects*

- **Objective:** Identify innovative e-government projects from around the world.
- **Criteria:**
  - Impact on citizens
  - Innovation and creativity
  - Sustainability
  - Scalability
- **Award Categories:**
  - Best overall project
  - Most innovative project
  - Best citizen-centric project
  - Best use of technology

### *4. Debate with Keynote Speakers*

- **Format:** Interactive panel discussions with keynote speakers and audience participation.
- **Topics:**
  - Ethical implications of AI in government
  - Challenges and opportunities of open government
  - The future of e-government
  - The role of government in the digital age

### *Additional Considerations*

- **Partnerships:** Collaborate with international organizations, government agencies, and industry partners.
- **Marketing and Promotion:** Utilize social media, email marketing, and traditional media to reach the target audience.
- **Conference Platform:** Invest in a robust online platform for virtual and hybrid participation.
- **Post-Conference Activities:** Publish conference proceedings, organize follow-up webinars, and create a community of practice.

By carefully planning and executing these components, the IFGICT Summit Conference eGov Unit can become a leading platform for knowledge exchange and collaboration in the field of e-government.
